Equilon Enterprises, LLC, Shell Oil Production, US (Equilon) AB 2588 Public Meeting

South Coast Air Quality Management District

July 22, 2020

Purpose of Meeting

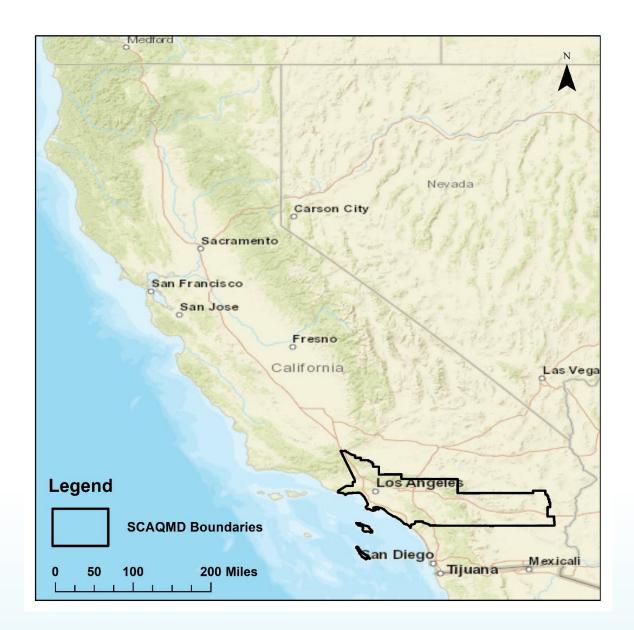

Who We Are

- The South Coast AQMD is the regional agency responsible for air quality for areas in LA, Orange, Riverside and SB Counties
 - Largest of the 35 local air agencies in CA
 - Work with CARB and EPA to meet state and federal standards

Responsibilities

- Control emissions from stationary sources (e.g., power plants)
- Comply with U.S. government air quality standards
- Permit and inspect 28,400 affected businesses
- Administer \$100 million of incentive funding annually

South Coast AQMD's Air Toxics Program

The Air Toxics "Hot Spots" Information & Assessment Act (AB 2588)

- State law enacted in 1987 (Connelly)
- Public Right-to-Know Program
- Purpose
 - Collect emissions data with updates every 4 years
 - Identify facilities having localized impacts
 - Evaluate potential health risks through Health Risk Assessments
 - Notify residents of those potential health risks
 - Reduce health risks below certain thresholds
- Rule 1402
 - Implements requirements of AB 2588
 - More stringent requirements for reducing health risk

Equilon

- Located at 20945 S. Wilmington Ave in Carson, CA.
- Bulk gasoline and chemical distribution terminal
- HRA required based on 2015 emissions

Boundary of Equilon

Operations at Equilon

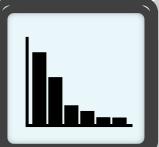

- Primary sources of risk are from portable diesel-fired internal combustion engines and storage tanks
- Other emission sources include a soil vapor extraction system, bioreactor, wastewater treatment system, and truck load racks

About Health Risk Assessments

Estimates the chance that a person may experience a health effect from toxic air contaminant emissions

Snapshot can change if toxic air contaminant emissions are reduced

"Snapshot" based on toxic air contaminant emissions from one year of operation

Assumes 2015 emissions levels for 30 years

Conservative assumptions people are outdoors
24 hours, 7 days a week
in one location

3 Key Health Risk Elements of Rule 1402

Cancer Risk

- Estimates the increased probability for cancer
- Expressed in "Chances in a million"

Non-Cancer Risk

- Estimates non-cancer health effects
- Acute non-cancer effects are from shortterm exposure
- Chronic non-cancer effects are from longterm exposure
- Expressed using a Hazard Index (HI)

Cancer Burden

- Estimates the increase in the occurrence of cancer cases in a population subject to a cancer risk of 1 in a million or greater
- Cancer burden ≥ 0.5 requires risk reduction

Health Effects of Key Toxic Air Pollutants

Toxic Air Pollutant	Health Effect	
	Exposure	Potential Effects
Diesel Particulate Matter	Long-term	Cancer and non-cancer chronic effects on the respiratory system
Benzene	Short-term and Long- term	Cancer, non-cancer acute, non-cancer chronic, non-cancer chronic 8-hour effects on the human reproductive, blood, and immune systems

Rule 1402 Health Risk Thresholds

Cancer Risk Thresholds

Risk Reduction Cancer Risk ≥ 25 in one million

Public Notification Cancer Risk ≥ 10 in one million

Non-Cancer Risk
Thresholds

Risk Reduction Non-Cancer $HI \ge 3$

Public Notification Non-Cancer HI ≥ 1

Cancer Burden
Threshold

Risk Reduction Cancer Burden ≥ 0.5

Cancer Risk Evaluations

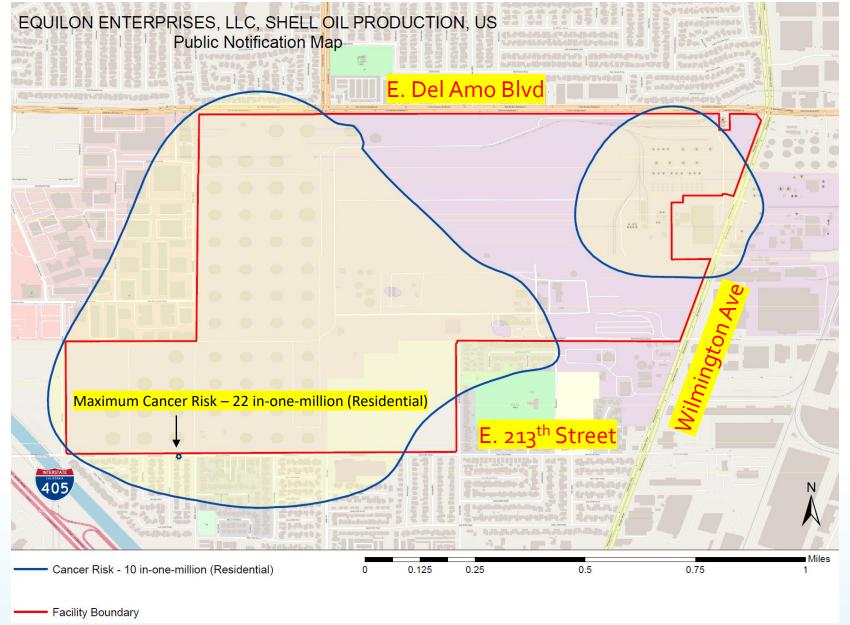

Residential Receptor

- Continuous exposure for 30 years
- All age groups evaluated

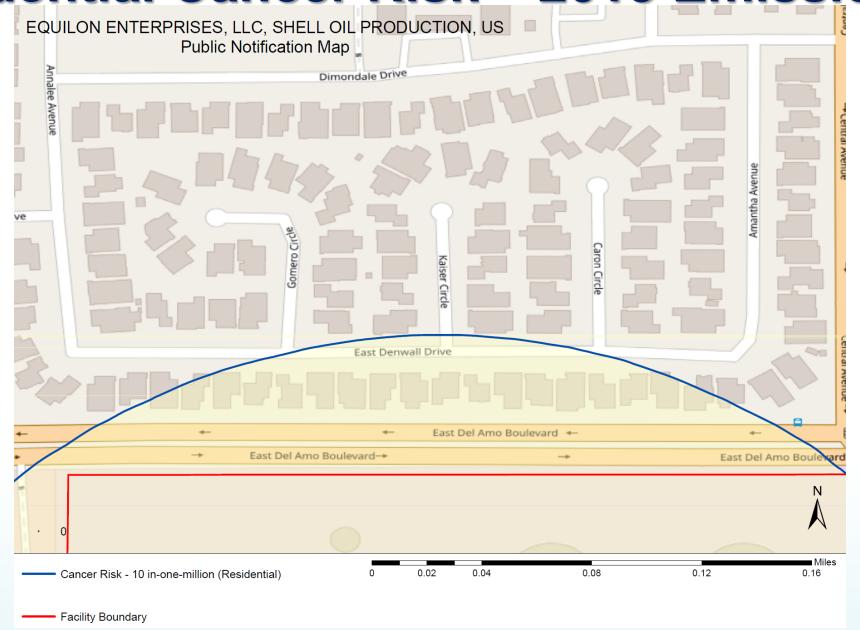

Offsite Worker Receptor

- Exposure for 8 hours per day, 5 days per week for 25 years
- Adult age groups evaluated

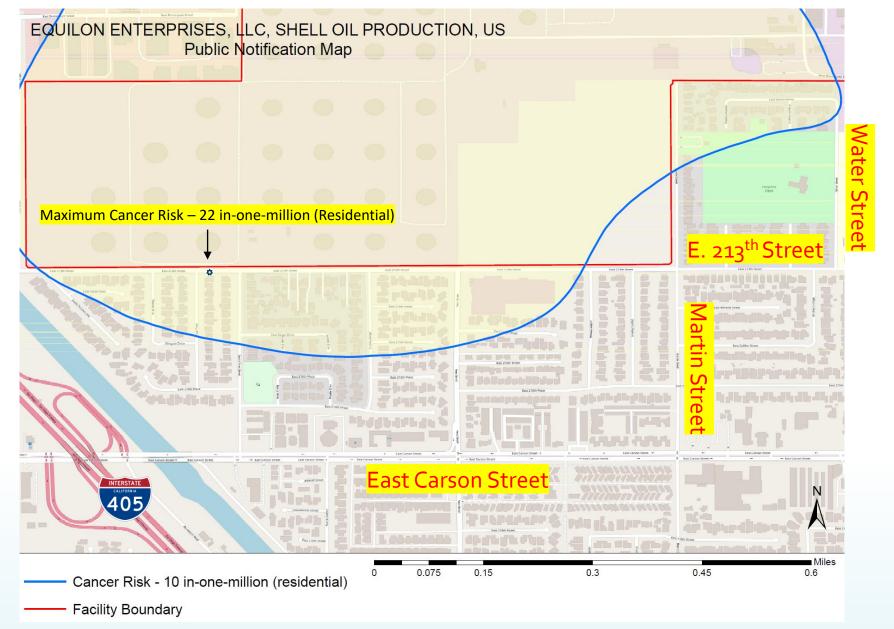

Residential Cancer Risk – 2015 Emissions

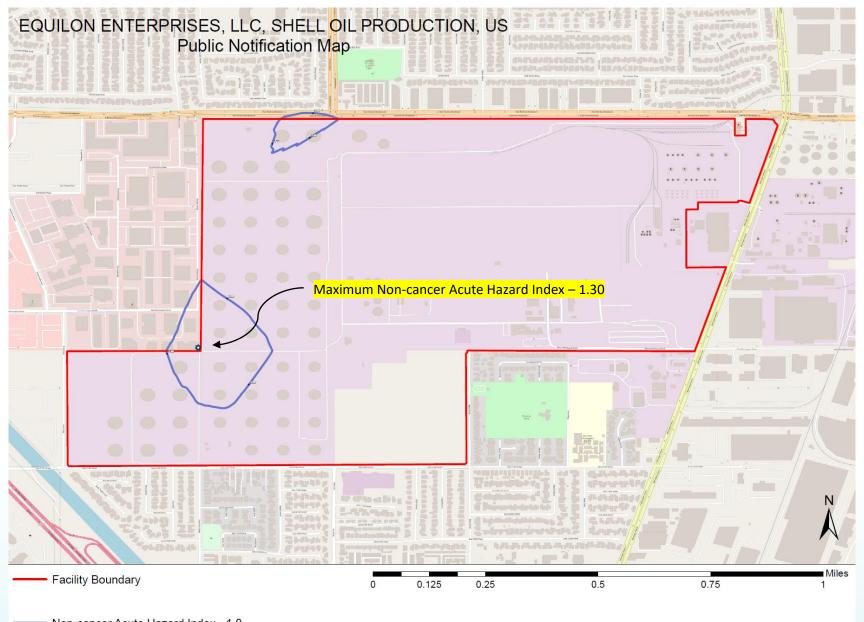

Residential Cancer Risk – 2015 Emissions

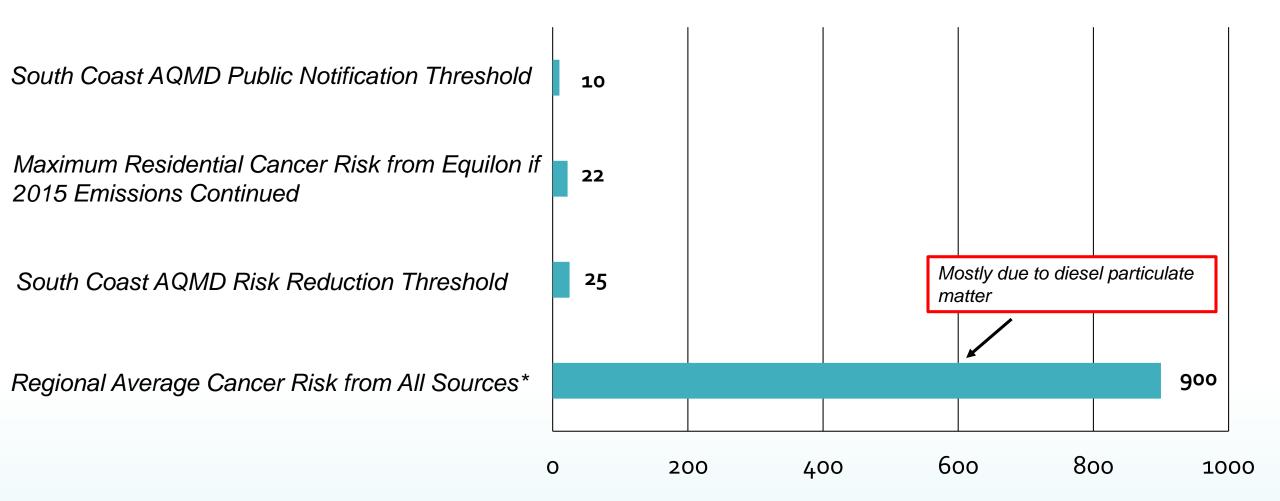

Residential Cancer Risk – 2015 Emissions

Non-Cancer Acute Risk – 2015 Emissions

Cancer Risk Context

* Based on MATES IV study

Public Notification Process

- AB 2588 Notification
 - Letter sent to ~200 addresses
 - Public meeting via Zoom
