**Subject:** [EXTERNAL] Additional evidence of Hyperion violations

Dear Board members,

I must bring to your attention the Hyperion event on 6/27/2024 where the H2S levels were measured at 31 ppb. and they sent us running from our homes. We received a follow-up email from Tonya Shelton of LASAN on 6/28/2024 where they adjusted the reading down to 27 ppb to avoid an automatic NOV. Now they have yet again quietly adjusted that reading down to a mere 1.4 ppb. I believe it is to mess with the historical data and erase the truth.

I have attached the Images for your convenience.

Thank you for your attention to this very serious violation and manipulation of facts.

Sincerely,  
Tamara Kcehowski
