

Permit Streamlining Task Force Subcommittee

December 5, 2019

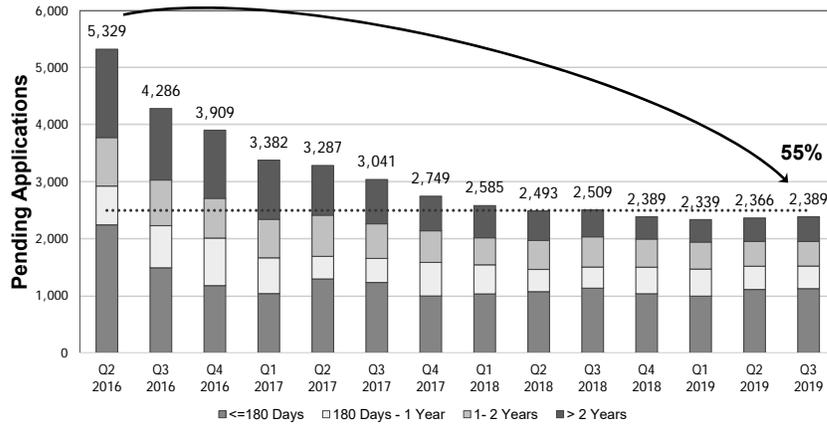

Agenda

- Pending Applications Inventory Update
- On-Line Filing Update
- Dashboard Update
- Permit Processing Handbook Update

Pending Application Inventory Update

Pending Applications less PCs Issued (2016 - 2019)

Ongoing Goal

Maintain pending applications without PC issued between 2,250 and 2,500

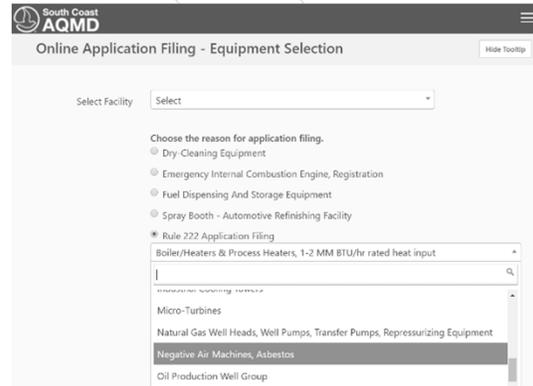

6

Online Filing Update

7

Online Rule 222 Registration

- Rule provides streamlined alternative to permits
 - Limited to low emitting equipment
 - Registration as condition for exemption
 - Categories tracked for prospective future reductions
- Currently file via pdf form printout submittal
- Online filing automates process
 - Data quality assurance
 - Online payment
 - Electronic issuance

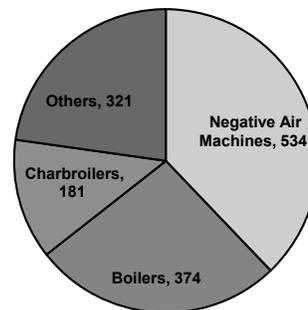

8

Online Rule 222 Registration (cont.)

- Three main registered equipment types
 - 222-A, Negative Air Machines (Asbestos)
 - 222-B, Boilers (1-2 mmbtuh)
 - 222-C, Commercial Charbroilers
- Represents ~ 80% of R222 Registrations
- Online Filing and Issuance

Average Annual Registrations (2016-19)

Negative Air Machines
 Boilers
 Charbroilers
 Others

222A - Negative Air Machine

NEGATIVE AIR MACHINE means a machine or contrivance whose primary use is to remove asbestos emissions from residential or commercial abatement projects by passing asbestos containing air from an isolated work area by means of negative air pressure to a HEPA filtration system.

Please review the questions below and click the yes/no button if they apply to your Negative Air Machine Equipment.
Please note that you can register more than one equipment at a time.

Yes Is this equipment used for asbestos removal only?

Continue >

- Eligibility screen
- Redirects user if:
 - Permit required; or
 - Registration not required

25

Instructions

Please click on the Add Negative Air Machine button to add a new equipment application grouping. You will be able to register up to 25 pieces of equipment at a time, grouped by common Manufacturer, Model No. and Equipment Type.

Online application tool support: onlinepermits@aqmd.gov.

Rule 222 Online Application Filing - Negative Air Machines, Asbestos

Application Supplemental Documents Payment Submission

State: CA ZIP: 91705

Application Information

Group 1: Total Number of Applications: 1

Manufacturer: Aerospace American Model: 9103H Equipment Type: Negative Air Machine

Number	Application Number	Serial Number
1	548265	1

Authorization

Name of Responsible Official: First Last

Four step process:

1. Form based data entry
2. Opportunity for supplemental document submittal
3. Payment
4. Attestation and submittal

**Operating Parameters for Rule 222
Negative Air Machines**

Retain these operating parameters and your filing receipt on site.

1. Operation of this equipment shall be conducted in compliance with all data and specifications submitted with the application under which this filing is issued unless otherwise noted below.
2. This equipment shall be properly maintained and kept in good operating condition at all times.
3. The HEPA filters used in this equipment shall be certified by the manufacturer to have a minimum control efficiency of 99.97% on 0.3 μ m particles.
4. Identification tag(s) or name plate(s) shall be permanently affixed and displayed on this equipment to show manufacturer model number and serial number, which should be in a position that is accessible for visual reading.
5. After use, this equipment must be emptied and cleaned within a negative air enclosure, and filters and waste collected with this equipment must be disposed as friable asbestos waste.
6. All maintenance works on this equipment which requires partial or total dismantling shall be

- Final registration review
- Receipt via email following attestation and submittal

13

Online Rule 222 Registration

Next Steps

- Release for production
- Outreach for three main equipment types

14

Pending Application Status Dashboard Update

15

Pending Application Status Dashboard

Initial Observations - Snapshot (October 2019)

Processing Status

- Roughly 60% awaiting action
- Awaiting actions split evenly between facility and agency

16

Pending Application Status Dashboard

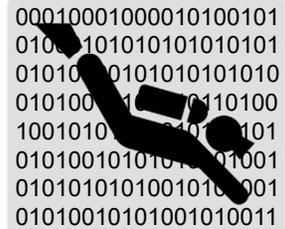

Initial Observations - Snapshot (October 2019, cont.)

Completeness Determ. (Facility Action)		In Process		Awaiting Facility Action		Awaiting South Coast AQMD Action	
A/I Request	14%	Engineering	41%	Compliance	5%	Supv/Mgr Review	7%
Related App A/I	1%	Evaluation and		Review Draft	1%	Related App Proc.	5%
Fee Resolution	< 1%	Administrative		Public Notice Distr.	< 1%	S/T Review	4%
		Processing		Conduct S/T	6%	Policy Review	3%
				Awaiting Constr.	3%	Field Eval	3%
						Other Agency Rev.	1%
						Public Notice	1%
						HRA / Modeling	< 1%

17

Pending Application Status Dashboard Ongoing Review

- Review larger awaiting action categories for streamlining opportunities
- Source testing working group
 - “Emissions Quantification and Testing Evaluation” (EQuaTE)
 - Additional online submittal, monitoring and tracking tools proposed
- Internal enhancements to Dashboard to improve granularity for a deeper dive into the data
- Continue to build and refine data in order to correlate residence time with status conditions

18

Permit Processing Handbook Update

19

Background

- First published in 1989
- Served as reference for engineering evaluation of permit applications for commonly encountered equipment type:
 - ✓ Ensure uniform evaluation
 - ✓ Apply consistent and enforceable conditions
 - ✓ Train new or cross train existing engineers
 - ✓ Improve efficiency
- Included 19 sections, each focusing on an equipment category

20

Updating Permit Processing Handbook

Goals:

- Update handbook to reflect current requirements and practices
- Ensure consistent evaluation of similar equipment and resultant permit requirements
- Provide public and permit applicants insights to data needs and permit evaluation criteria
- Efficient permit processing

21

Updating Permit Processing Handbook (cont.)

In addition to updating specific chapters on commonly encountered equipment, include:

- Permit Processing Overview
- Source / Emissions Characterization
- Regulatory Requirements: by Rule / Regulation
- Guiding Principles for Permit Writing
- Permit Evaluation Template

22

Permit Processing Handbook Equipment Chapters

- Separate chapters on basic and control equipment
- Each chapter to include:
 - Process description and air quality impact
 - Emission calculations/methods
 - Regulatory requirements & compliance evaluation
 - Sample permit conditions
 - Criteria for additional requirements/conditions

23

Next Steps

- Drafts by third quarter
- Overview sections
- Five equipment chapters:
 - ✓ Abrasive Blasting
 - ✓ Dry Cleaners
 - ✓ Emergency IC Engines
 - ✓ Gasoline Refueling
 - ✓ Spray Booths

24
