## **Filing an Air Quality Complaint on Your Smart Phone is Easier**

*Also Unveiled: Access to local sources of pollution and facility compliance information from your phone*

**DIAMOND BAR** – South Coast AQMD’s award-winning smartphone app has two new features. The public can submit and track air quality complaints directly from their smartphone and can access local facility information. The smart phone app and all its features are also available via the Spanish version of the app and is part of the agency’s commitment to provide increased transparency and engagement with the public.

The new update showcases a more robust complaint reporting feature, allowing users to quickly submit air quality complaints, including photos directly from their smartphone. The public can then easily track the status of a submitted complaint through each stage of the process.

The app update allows easy access to South Coast AQMD’s F.I.N.D. (Facility Information Detail) tool, allowing the public to effortlessly search for local sources of air pollutions regulated by South Coast AQMD, including facility permit status, history of violations, and annual emissions information.

Download the current free smartphone app to gain immediate access and utilize these highly anticipated updates. For more information on South Coast AQMD’s mobile app, please visit <https://www.aqmd.gov/mobileapp>.

South Coast AQMD is the regulatory agency responsible for improving air quality for large areas of Los Angeles, Orange, Riverside and San Bernardino counties, including the Coachella Valley.
