## South Coast AQMD Issues Windblown Dust Advisory for the Coachella Valley and Banning Pass Areas

*Valid until Tuesday 8:00 a.m.*

Valid Sunday 4:00 PM until Tuesday 8:00 AM

### Current Conditions

- In the past 24 hours, Air Quality Index (AQI) levels reached **Moderate** in Indio and Mecca.

To view current air quality in your neighborhood, download the [South Coast AQMD app](#) or visit [www.aqmd.gov/AQImap](http://www.aqmd.gov/AQImap).

### Forecasted Air Quality Impacts

- Windblown dust is expected to cause AQI values to reach **Unhealthy** or higher between Sunday evening and Tuesday morning
- High winds can lead to windblown dust; gusts up to 30 miles per hour are expected
- AQI levels will vary over time and by location depending on wind speed and direction
- AQI levels will likely be highest at night; air quality might be worse in the northern and central Coachella Valley than other areas
- AQI may also reach **Unhealthy for Sensitive Groups** levels in the afternoons and evenings due to the ongoing heatwave causing high ozone levels. See the [South Coast AQMD active advisories page](#) for more information.
- South Coast AQMD will issue an update if poor air quality is expected to persist

### Detailed Forecast

Sunday and Monday daytime	Air quality will deteriorate starting Sunday evening and may reach <b>Unhealthy for Sensitive Groups</b> or worse. Lighter winds during the day on Monday will reduce dust levels temporarily.
Sunday and Monday nights	AQI may reach <b>Unhealthy</b> or higher. Winds on Sunday night will be stronger than Monday, and will likely cause more dust.

*South Coast AQMD will issue an update if additional information becomes available.*

### If you are in an area impacted by windblown dust or ash:

- Limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter.
- Avoid vigorous physical activity.
- Run your air conditioning and/or an air purifier. If possible, do not use swamp coolers or whole house fans that bring in outside air.
- Help minimize dust pollution by stabilizing loose soils and slowing down if driving on dirt roads.

For more information, see the [EPA Guide for Particle Pollution](#) (PDF).

South Coast AQMD is the regulatory agency responsible for improving air quality for large areas of Los Angeles, Orange, Riverside and San Bernardino counties, including the Coachella Valley.
