

# South Coast Air Quality Management District

## NOTICE OF PUBLIC MEETING TO DISCUSS HEALTH RISK ASSESSMENT FOR A FACILITY IN YOUR NEIGHBORHOOD

The following business in your neighborhood has been emitting toxic air pollutants that could potentially cause a risk to public health. Bowman Plating Co. Inc. (Bowman) was required to conduct a Health Risk Assessment to evaluate how emissions are released and dispersed from Bowman, and the potential impact those releases may have to public health.

Business Name	Location Address	Type of Business
Bowman Plating Co. Inc.	2631 East 126 <sup>th</sup> Street Compton, CA 90222	Metal finishing and plating of aerospace parts

As the air pollution control agency for this area, South Coast Air Quality Management District (South Coast AQMD) will hold a public meeting to discuss the results of Bowman’s 2024 Approved Health Risk Assessment. The purpose of this meeting is to inform the public about the approved 2024 HRA, provide an opportunity to ask questions directly to staff, learn more about toxic risk and the AB 2588 Program, and to provide feedback to the South Coast AQMD and to the facility. Informational materials including the Approved HRA are available at <http://www.aqmd.gov/home/rules-compliance/compliance/toxic-hot-spots-ab-2588/health-risk-assessment>. South Coast AQMD will hold the public meeting via video conferencing and by telephone. The meeting will be held in English and will be translated into Spanish. The audience will be able to participate during the public comment period.

Date & Time	Meeting Details
January 8, 2025 6:00 - 8:00 pm*	<p>INSTRUCTIONS FOR ELECTRONIC PARTICIPATION</p> <p>Join Zoom Webinar Meeting - from PC or Laptop <a href="https://scaqmd.zoom.us/j/92670382707">https://scaqmd.zoom.us/j/92670382707</a></p> <p><b>Zoom Webinar ID: 926 7038 2707</b> (applies to all) Teleconference Dial In +1 669 900 6833 One tap mobile +16694449171, 926 7038 2707 #</p> <p>Audience will be allowed to participate during public comment periods.</p>

\*Please note that the meeting will end once public participation has concluded or at 8:00 pm, whichever is earlier.

## INSTRUCTIONS FOR ELECTRONIC PARTICIPATION

### Instructions for Participating in a Virtual Meeting as an Attendee

- As an attendee, you will have the opportunity to virtually raise your hand and provide public comment.
- Before joining the call, please silence your other communication devices such as your cell phone or desk phone. This will prevent any feedback or interruptions during the meeting.
- Please note that during the meeting, all participants will be placed on mute by the host. You will not be able to mute or unmute your lines manually.
- Speakers may be limited to a total of three (3) minutes for their opportunity to provide comments. This time may be reduced if there are a large number of commenters to ensure that all comments can be heard. A countdown timer may be displayed on the screen for each public comment.
- Once you raise your hand to provide public comment, your name will be added to the speaker list. Your name will be called when it is your turn to comment. The host will then unmute your line.

### Directions for Video Zoom on a Desktop/Laptop/Smartphone

- If you would like to make a public comment, please click “Raise Hand”  button at the bottom of the screen.
- This will signal to the host that you would like to provide a public comment and you will be added to the list.
- Please Note: At the bottom of your screen, please click the “Interpretation” button and select the appropriate language.

### Directions for Telephone Line Only

- If you would like to make a public comment, please dial \*9 on your keypad to signal that you would like to comment.
- Please Note: There is no interpretation feature available when joining via telephone dial-in.

# South Coast Air Quality Management District

## Summary of Health Risk Assessment (HRA)

The approved HRA, which used 2019 emissions data, showed that emissions of toxic air pollutants called hexavalent chromium and nickel from Bowman may cause an increased health risk for people who live and work in the area as seen in the attached Facility Risk Map (Figure 1).

The attached information sheet provides additional background on the business, air pollutants, and health risks. The following table shows the estimated, potential health risks from the 2024 Approved HRA.

	2024 Approved HRA
Maximum probability of cancer for those living closest to the facility (30-year exposure)	673.5 chances in-one-million
Maximum probability of cancer for those working closest to the facility (25-year exposure)	44.2 chances in-one-million
Maximum short-term non-cancer health effects (1-hour exposure)	2.89 hazard index*

\*A hazard index above 1.0 increases the probability of adverse human health effects.

For more information about South Coast AQMD programs to control toxic air pollution or the public meeting, please contact Victoria Moaveni of South Coast AQMD at (909) 396-2455 or [vmoaveni@aqmd.gov](mailto:vmoaveni@aqmd.gov). For more information about the facility, please contact Daniel Cunningham, Executive Vice President of Bowman Plating Company, Inc. at (310) 639-4343 ext. 108 or [dan@bowmanplating.com](mailto:dan@bowmanplating.com).

*Disability and language-related accommodations can be requested to allow participation in the Bowman Plating Co. Inc. Rule 1402 public notification meeting. The agenda will be made available, upon request, in appropriate alternative formats to assist persons with a disability (Gov't Code Section 54954.2(a)). In addition, other documents may be requested in alternative formats and languages. Any disability or language-related accommodation must be requested as soon as practicable. Requests will be accommodated unless providing the accommodation would result in a fundamental alteration or undue burden to the South Coast AQMD. Please contact the AB 2588 Hotline at (909) 396-3610 from 7:00 a.m. to 5:30 p.m., Tuesday through Friday, or send the request to [AB2588@aqmd.gov](mailto:AB2588@aqmd.gov).*

## 2024 Approved HRA Facility Risk Map (Figure 1)

Bowman Plating Co. Inc.

(South Coast AQMD ID No. 18989)  
Compton, California

### Public Notification Area Map

Residential cancer risk of at least 10 chances in-one-million (Inside Yellow Outline)

Worker cancer risk of at least 10 chances in-one-million (Inside Orange Outline)

Acute Hazard Index of at least 1.0 (Inside Blue Outline)

Facility Boundary (Red Outline)

### Public Notification is Required by South Coast AQMD Rule 1402 if any of the following criteria are met:

- Maximum probability of cancer for those living closest to the facility is greater than 10 chances in-one-million
- Maximum probability of cancer for those working closest to the facility is greater than 10 chances in-one-million
- Long-term non-cancer health effects have a hazard index greater than 1.0 for those working and living closest to the facility
- Short-term non-cancer health effects have a hazard index greater than 1.0 for those who are near the facility

**BUSINESSES RECEIVING THIS NOTICE SHOULD POST IT  
WHERE IT IS MOST LIKELY TO BE READ BY EMPLOYEES.**

## INFORMATION SHEET

### What are toxic air pollutants?

Chemicals that can cause cancer and other adverse health effects such as harm to the human respiratory system are known as toxic substances. When these toxic substances are released in the air, they are called toxic air pollutants. Toxic air pollutants come from a variety of sources including chemical plants, large manufacturers, businesses and cars and trucks. Many products used at home, such as cleaners and paint thinners also contain toxic air pollutants.

### What toxic air pollutants does this facility emit and what are their health impacts?

Exposure to elevated concentrations of toxic air contaminants can have potential cancer and non-cancer health risks. Long and short term health-based levels have been established by the California Office of Environmental Health Hazard Assessment (OEHHA).

The facility emits the following toxic air pollutants as a result of metal finishing processes:

Pollutants	Possible Health Effects
Hexavalent Chromium	Long-term exposure can cause lung or nasal cancers; and adverse effects to the respiratory system (such as nasal, throat, or respiratory irritation or allergies)
Nickel	Long-term exposure can cause lung or nasal cancers, and adverse effects to the respiratory and hematologic systems. Short-term exposure can cause adverse effects to the immune system

### How was the health risk from this facility determined?

The 2024 Approved HRA used estimated amounts of pollutants released from operations at Bowman Plating Co. Inc. That information is inputted into a computer-based model that evaluates air quality dispersion and predicts air pollution concentrations throughout the community. The results are then compared to exposure levels determined by OEHHA to predict potential impacts to people's health, including the greater impacts that toxic air pollutants can have on children.

### What did the Health Risk Assessment find?

An HRA is currently the best method for estimating the amount of exposure to a chemical over a long period of time and the potential health impacts.

The 2024 Approved HRA for Bowman Plating Co. Inc. was calculated using conservative exposure periods that

assumed continuous exposure from the facility.

The 2024 Approved HRA, based on known information at the time, found that people who live in the area shown on the Facility Risk Map (Figure 1), if continuously exposed for 30 years, would have a maximum increased risk of 673.5 chances in-one-million of developing cancer in the most impacted location. Those who work in the area would have a maximum increased risk of 44.2 chances in-one-million of developing cancer in the most impacted location. Those in the area would also experience a maximum acute hazard index in the most impacted location that is 2.89 times higher than state health-based guidelines. The cancer risks are primarily due to hexavalent chromium emissions from anodizing operations at the facility. The acute hazard is primarily due to nickel from anodizing processes from this facility.

### What is being done to reduce the health risks from this facility?

South Coast AQMD Rule 1402 — Control of Toxic Air Contaminants from Existing Sources applies to facilities that exceed specific risk thresholds (e.g., cancer risk greater than 25 chances in-one-million) and requires the facility to submit a plan to reduce its risk below thresholds and implement this risk reduction plan within two and a half years after approval.

In this case, Bowman is required to conduct both public notification and risk reduction. South Coast AQMD has also developed other programs designed to prevent pollution and reduce exposure to toxic air pollution, such as air toxic regulations specific to certain sources.

### What is the cancer risk from toxic air contaminants in general?

The Multiple Air Toxics Exposure Study V (MATES V) presents estimates of cancer risk throughout South Coast AQMD's four-county jurisdiction. The estimated risk for cancer from all toxic air contaminants emitted from all sources (cars, trucks, factories, power plants, etc.) is about 455 chances in-one-million averaged over the region's population.

### How can I get more information?

Table ES-2 of MATES V Executive Summary, available at: <http://www.aqmd.gov/docs/default-source/planning/mates-v/mates-v-final-report-9-24-21.pdf>

A copy of South Coast AQMD's approved Health Risk Assessment for Bowman is available online at: <http://www.aqmd.gov/docs/default-source/planning/risk-assessment/bowman/bowman-2019-modified-hra-report.pdf>
