Subject: Torrance refinery

Refinery dangers and explosions have occurred and the Torrance refinery presents a very realistic and possible danger to the community of Torrance and surrounding areas. What I don't understand is why you haven't banned hydrofluoric acid at this facility and at Wilmington?

I live in Redondo Beach and fear that an explosion could come as far as Redondo and harm me and my family. But more importantly I fear for the lives and health of people living in Torrance and Wilmington.

Gerald Orcholski
