Subject: [EXTERNAL] Rail Yard ISR Rule - (2306) - please support on Aug. 2nd

Dear SCAQMD board,

I urge you to please support the above ruling. Basically I am for just about anything that will help clean up our air. I have been living in the Inland Empire for over 35 years and my breathing and allergy problems started with living here, an area with some of the worst particulate pollution in the country, and have gotten increasingly worse with each year.

Please continue to do what you can to continue to keep our air breathable in a way that won't constantly make us sick by passing these clean air rules. Thank you.
