**Subject:** [EXTERNAL] Support for Indirect Source Review Rule PR 2306

As a resident of the District covered by the SCAQMD and someone who lives within .5 of a mile of active railway and in an area with some of the worst air pollution (Ozone, NOx, SOx, PM) in the country, I support a strong Indirect Source Review Rule (PR 2306) for regulating pollution in railyards. This rule will reduce NOx emissions from such facilities . We already know that Indirect Source regulation can be successful; as demonstrated by the SCAQMD Indirect Source Rule for Warehouses.

The rule will also create green jobs for our local economy.

This is a strong rule which will coordinate the work of different agencies and provide accountability; meaning we will see a real achievement of emission reductions.

THIS is exactly the type of rule that the SCAQMD was designed to draft, implement and enforce. I await a unanimous "yes" vote from the Board of the SCAQMD.

Thank you
